

Step 1: Reset and Pair the Scanner to the iPhone

1. (Make sure your scanner is powered on first.)

From the Settings icon () on your iPhone, select 'Bluetooth'.

2. Wait for the device to appear on the 'Devices' list.

(Device name should be a number similar to the one below.)

3. Scan the barcode below & select the device from the 'Devices' list.

A quick low-mid-high tone will indicate a successful pairing.

Step 2: Scanner Setup for the iPhone

High tone, Low tone	→	Unsuccessful Scan
One Single Tone	→	Successful Scan
Low, High, Low, High, Low, High, followed by Long Tone	→	Successful Update

Complete Step 1 (previous page) first. Then, start here, scanning left to right, making sure to scan 4—19 quickly.

1. Adjust the Volume

2. Disable Hardware Reset
